Project Overview

Maple Ridge Memory Care provides state of the art care in a homelike environment. The building houses 56 beds in 2 resident wings, each with their own dining room, living room and kitchen. Administrative areas and a lobby for families and guests are centrally located. To create a unique circulation experience for the residents, a circular "interior street" was created in the hallways, using clapboards and other exterior finishes. Outdoor spaces include a fenced courtyard, gazebo and landscaping that create a serene setting and attractive views.

Project Highlights

- 50 Private/Shared Suites
- Interior 'Street Scape'
- Unique Circulation Spaces
